

## KmR - End Cap and Marker

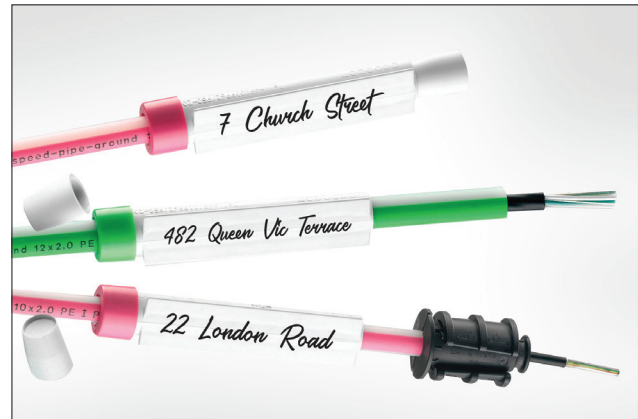

### Direct Buried / Push Fit

#### Application/Product Description

The KmR was designed to enable network operators to seal off an open-ended duct against gas, water and dirt, which can act as marker label. The KmR is suitable for direct buried applications and can be easily installed. KmR's are available in variety of different sizes to suit the corresponding SpeedPipe ducts.

#### Features and benefits

- Seals and identifies in one product
- Gas and water tight up to 0.5 bar
- Push Fit application
- Suitable for chambers or direct buried applications
- No specialist tool required
- No adhesive required
